

A gypsum-bonded investment that provides high thermal expansion at low temperatures.

Cristobalite investment is ideal for casting low-fusing crown & bridge alloys.

Cristobalite investment is formerly a Whip Mix product.

Features

- Provides high thermal expansion, even at relatively low temperatures
- Able to utilize the same mixture by simple standard vacuum or painting techniques for all types of inlays and full casts

Typical Material Properties*

Water-to-Powder Ratio
30/100
Working Time
3 minutes
Set Time
30 minutes
Set Expansion
0.5%
Compressive Strength
700 psi (5 MPa)

**These results are based on the testing methods, frequency and procedures of Ransom & Randolph or its approved suppliers. The levels referenced herein are only for general guidance and do not constitute a firm specification.*

Availability

Cristobalite investment

50 grams (144 count).....01228
