

Water-based investment for high-temperature alloys.

SC-PT investment is engineered for casting platinum-based alloys using centrifugal techniques and offers a simpler workflow by mixing directly with water — no special liquids or binders required.

Typical Material Properties*

Water:Powder Ratio
32–34:100
Working Time
20–25 minutes

**These results are based on the testing methods, frequency and procedures of Ransom & Randolph or its approved suppliers. The levels referenced herein are only for general guidance and do not constitute a firm specification.*
