

## Premium Dental Laboratory Products

R&R dental lab waxes are formulated to support dependable results across shaping, modeling, and casting applications. Designed for consistent handling and clean performance, this product range helps streamline laboratory workflows from bite registration through final model preparation.

### TruWax™ baseplate wax

All-purpose baseplate wax for everyday dental lab applications.

An all-purpose baseplate wax formulated for a wide range of dental lab applications. TruWax offers a combination of flexibility, handling ease, and dimensional stability across extreme temperatures.

#### Features

- Non-sticky handling
- Flexible and easy to adapt
- Firmly holds teeth
- Efficient shaping and contouring
- Boils out cleanly with no residue

### R&R® boxing wax

Boxing wax is formulated for use around impressions before stone pouring, ensuring clean, accurate models. It adheres without heat and maintains integrity through the bench cure process. Available in regular or extra-thin strips.

#### Features

- Adheres securely without heat
- Melts at 176°F (80°C)
- Withstands heat from bench cure of dental stone

### Neowax® baseplate wax

A medium to dark salmon pink baseplate wax designed for versatile dental applications.

Neowax maintains its shape across a wide temperature range, making it well suited for applications from bite registration to arch form establishment. Easy to shape and carve, it cools evenly, minimizes shrinkage, and boils out cleanly for precise, repeatable results.

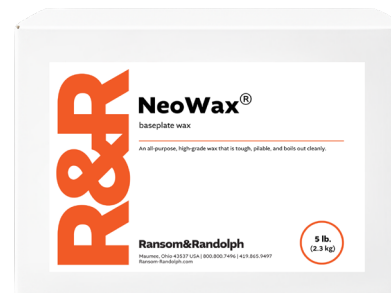

Easy to shape, carve, and boils out cleanly, Neowax minimizes shrinkage and supports precise results across multiple uses.

#### Features

- Holds form across a wide range of temperatures
- Softens evenly and cools with minimal shrinkage
- Flexible and easy to carve
- Boils out cleanly with no residue

#### Uses

- Artificial dentures
- Inlay patterning
- Boxing of impressions
- Casting
- Establishing the arch form and occlusal plane
- Recording bite relation
- Corrective impressions
- Bite registration
