

Produces smoother, more consistent casting surfaces than other two-part platinum products.

Platinum investment & binder is a two-part system consisting of investment powder and a concentrated, acid-based liquid binder. Unlike other acid-based binders, Platinum binder stays fully suspended, delivering consistent results from mix to mix. It is ideal for platinum casting because it meets the high standards required for precision, consistency, and quality.

Features

- Two-part investment system designed specifically for platinum casting.
- Binder stays fully suspended, preventing separation and delivering consistent mixes.
- Produces smoother, more uniform casting surfaces than other two-part platinum systems.
- Engineered for applications requiring precision, consistency, and high-quality finished pieces.

Typical Material Properties*

Diluted Binder:Powder Ratio

30:100

Binder:Water Ratio

1:14
